

FOX CHASE CANCER CENTER'S TEEN RESEARCH INTERNSHIP PROGRAM

The Teen Research Internship Program (TRIP) is a rigorous laboratory-based course for high school students who are motivated to explore their interests in **science, technology, engineering, art, and math (STEAM)**.

The **mission** of TRIP is to foster an enthusiasm for science by offering students a chance to conduct hypothesis-driven research and hands-on learning in a laboratory. In addition, students engage with Fox Chase faculty and staff during one-on-one mentorship and acquire skills necessary for team building, resiliency, and leadership, by joining a growing family of driven and curious students.

FOSTERING ENTHUSIASM FOR SCIENCE THROUGH:

- Self-driven and collaborative learning
- Network building with peers and professionals from across Philadelphia
- Exploring career paths across the STEAM landscape
- Near-peer mentorship from program alumni and one-on-one mentorship with STEAM professionals
- Designing research questions with real-world implications

Meet our students who share their experiences here:

HELP MORE STUDENTS EXPLORE SCIENCE:

Your support will allow us to offer this program at no cost to all participants! Your tax-deductible contributions will directly support and expand the program. To donate, visit donate.foxchase.org/TRIP.

Pennsylvania-based businesses can earn tax credits for donating to TRIP through Pennsylvania's Education Improvement Tax Credit Program (learn more here: dced.pa.gov/programs/educational-improvement-tax-credit-program-eitc/).
